

## **Director - Procurement**

### **About Tyr Energy Development Renewables, LLC**

Tyr Energy Development Renewables, LLC ("TED Renewables") is a wholly owned affiliate of Tyr Energy. Tyr Energy represents the North American cornerstone of the ITOCHU Corporation global electric power strategy, focused on clean and renewable generation and technology solutions.

TED Renewables is active in the development and commercialization of renewable electric power facilities. Through ITOCHU affiliates we provide comprehensive management and oversight services to power generation and electric utility companies.

### **Position Description**

TED Renewables is in search of a highly motivated and experienced individual to fill the role of Director of Procurement. As our company continues to expand in the renewable energy development sector, this position will play a vital role in leading the procurement process for major equipment and services required for grid-scale solar and battery storage projects.

The primary responsibility of the Procurement Director will be to oversee and manage the procurement of key equipment necessary for the construction of our renewable energy projects. This includes developing and implementing procurement strategies, identifying reliable suppliers, negotiating contracts, and ensuring the timely delivery of equipment while maintaining high quality standards.

Beyond procurement, we are looking for someone who is passionate about contributing to various aspects of our company's operations. As a valued member of TED Renewables' team, you will have the opportunity to support other areas of the organization as needed. This could involve collaborating with teams involved in project development, EPC (Engineering, Procurement, and Construction), and project delivery.

Reporting directly to the Vice President of EPC & Project Delivery, you will work closely with senior leaders within the company. Your expertise and insights will be crucial in advancing the development of our existing project portfolio, as well as identifying and pursuing new greenfield prospects.

This is an exciting opportunity to join our fast-growing renewable energy development company and make a significant impact in the procurement process while contributing to the overall success of TED Renewables.

### **Duties and responsibilities:**

7500 College Boulevard, Suite 400  
Overland Park, KS 66210

- Lead all strategic procurement activities to support the development and construction of grid-scale solar energy and battery storage projects.
- Establish and maintain strategic relationships with OEMs of major solar and storage equipment.
- Responsible for developing the contracting strategy for procurement of major equipment to fit with the goals and risk profile of the project and the company.
- Provide feedback into the conceptual and detailed design process.
- Manage procurement RFPs to determine best-fit suppliers for major equipment and services.
- Serve as main point of contact for the RFP bidding process: scheduling and managing Q&A sessions, response deadlines, proposal deliverables, and supplier feedback.
- Analyze bids and qualify vendors based on quality, cost and contractual terms and provide recommendations to senior management team.
- Collaborate effectively with the Development, Commercial, EPC, and Interconnection teams at TED Renewables to ensure alignment on equipment selection.
- Work with counsel to develop and manage equipment supply agreements to ensure terms and conditions align with market expectations and all applicable project requirements.
- Manage contracts post-execution to ensure all contractual obligations are administered and fulfilled on time and in accordance with budget and equipment specifications.
- Remain abreast of renewable energy opportunities in the United States and national industry trends impacting the future of solar, BESS and renewables development
- Monitor risks associated with renewable equipment supply chain and procurement and develop mitigation strategies.
- Maintain forward-looking technology and cost projections for all solar and storage major equipment.
- Carry out other duties as assigned.

### **Qualifications/Requirements**

- At least five (5) years of work experience with a leading IPP, utility, or renewable developer.
- Proven record of accomplishment in solar or renewable energy development.
- Knowledge and experience with sourcing/procuring solar and energy storage major equipment and services.
- Bachelor's in engineering, supply chain management or business preferred.
- Demonstrated ability to identify and resolve issues and to prioritize critical path tasks.
- Exceptional process and project management skills.
- Strong commercial negotiation skills, with an understanding of the legal aspects of major equipment supply contracting.
- Professional presence and strong communication skills.
- Ability to succeed in a fast-paced, entrepreneurial office environment.
